

THE CRAWCUS SEAL

Four sealed stations on one steel core · Contract · Receipt · Attestation · Warrant

WHY THIS RAIL EXISTS

Regulators demand chain-of-custody

on every AI decision —
EU AI Act, GDPR Art.22,
FERPA, HIPAA, state laws

DPO · GC · Head of Compliance

Auditor evidence asks

used to take 6 weeks of
hand-collation

Eng leadership · Audit · CFO

Insurance won't bind

without auditable receipts
of what actually happened

CFO · Risk · Board

"Why did the AI decide that about my kid?"

needs a real, sealable
answer in plain English

Customer · CS · PR

EU AI Act Art.14

mandates "effective
oversight" by a natural
person — machineable

CTO · Product · GC

Bespoke forensics burns the eng team

— without a rail every
ask is one-off discovery

Eng leadership · On-call

The rail IS the seal

on every AI decision —
the product IS the audit

CEO · Brand

INPUTS

OUTPUTS

BUSINESS VALUE

"Prove it" → one bundle hash
not a 6-week discovery sprint

~240 eng-hrs saved /probe

Auditor day-3 finding
→ day-1 reassurance

~\$80k audit-fee cut /yr

DSAR / Art.15 in 30 sec,
not 30 days

~\$50k legal-ops /100 DSARs

Insurance underwriter binds
— receipts legible to actuaries

~30-50% AI-liability premium cut

GDPR Art.83 cap →
"here's the bundle, signed"

up to €20M (4% global rev) avoided

FERPA federal-funding
loss avoided

full federal contract preserved

HIPAA \$1,500-per-record
penalty avoided

~\$1.5M /1,000-record incident

EU AI Act Art.85
class action neutralised

~\$5-50M settlement avoided

Plaintiff sees signed chain
— settles, not litigates

~\$2-10M litigation cost avoided

Parent question answered
in plain language

— the seal IS the story

NPS +15-30 · churn -5-10%

Every link in the chain = one Receipt the regulator can ask for by hash.

The seal is the product. The chain is the moat.
